

Dashboard Variables

Description

In the next few lectures, we will look at how the create and use dashboard variables.

We will manually recreate fully a dynamic dashboard to query our SNMP devices that we've set up in the previous lectures.

Example Variables

Name	Type	Value/Query
interval	Interval	1m,10m,30m,1h,6h,12h,1d,7d,14d,30d
datasource	Datasource	MySQL
host	Query	SHOW TAG VALUES FROM interface WITH KEY = "agent_host"
interface	Query	SHOW TAG VALUES FROM interface WITH KEY = "ifDescr" WHERE agent_host=~ /\$host\$/
custom	Custom	abc, def, ghi, jkl
