

## Install Grafana

---

### Description

Grafana is excellent for monitoring time series data.

In this lecture, I will install Grafana

<https://grafana.com/grafana/download>

```
wget https://dl.grafana.com/oss/release/grafana_6.4.3_amd64.deb
sudo dpkg -i grafana_6.4.3_amd64.deb
```

**⚠ NOTE :** On a brand new Grafana/Ubuntu 18 install, you will likely see an error that the *libfontconfig1* dependency does not exist, so run the next 2 lines to fix this.

```
sudo apt-get install -y adduser libfontconfig1
apt --fix-broken install
```

The install has now completed.
